

### Always Open All The Time - Indoors or Out!

Light winds will not "spin" your sign like other models because the bottom of the banner is free and the wind load is minimized. If stronger winds are encountered the Wonder Pole & banner will rotate at the base. The fiberglass telescoping Always Open Banner Pole comes with a 30" cross bar (Accommodates a 28" wide banner up to 12' long), vinyl gold ball, and heavy duty carry bag. A simple pole sleeve at the top and bottom of the banner (instructions for sewing supplied) is all that is needed. The finished banner or flag slips over the pole, and the crossbar slips into the top pole sleeve of your banner. It's fast, easy, and you can use vinyl, nylon, or any other material to construct your banner.

#### Features:

- Telescopic height upto 12'
- 30" fiberglass, Lexan® coated crossbar with vinyl caps
- Gold vinyl ball
- PVC pole with gold finial and arm
- Water base
- Great portability. 5 minute assembly
