

Acrylic Light Pole Banner Construction:

It is our mission to produce the most durable light pole banners available in the market. Double folded and double lock stitch edges, double rolled and double lock stitch pole sleeves, proper placement of security grommets, and slow cure ink systems are the major components of a product you can depend on backed by our 2 year warranty.

Double-Rolled Pole Sleeves:

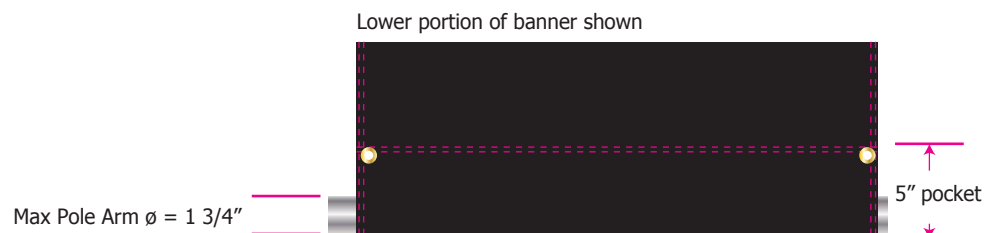

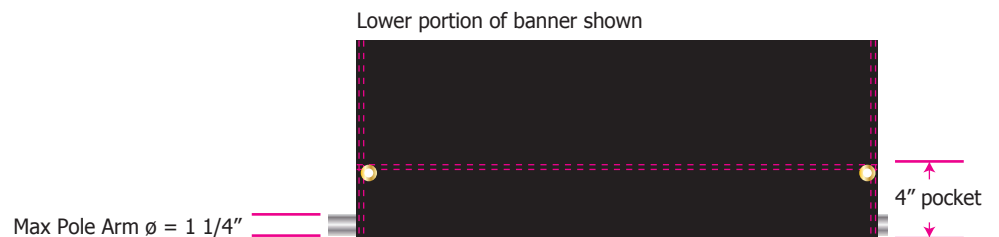

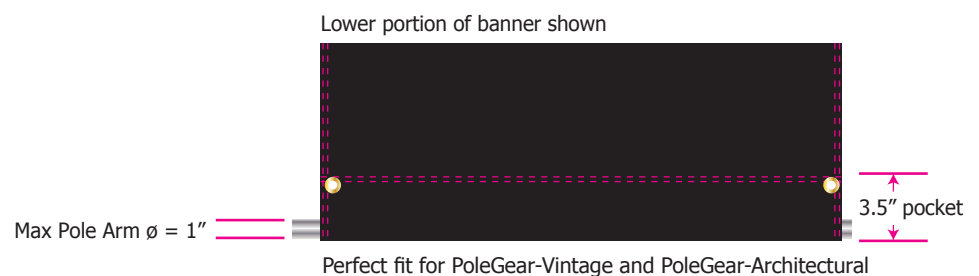

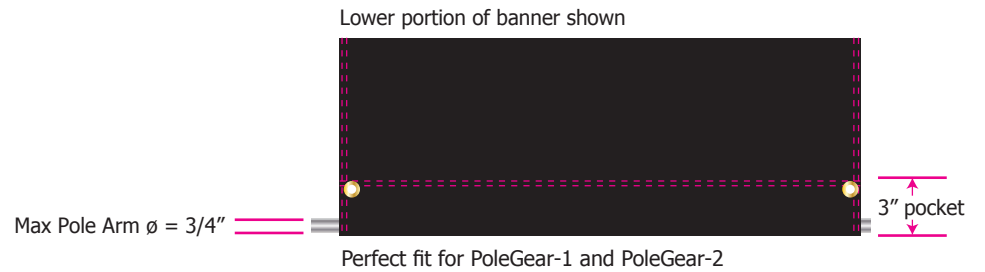

Provide the strength to the most vulnerable part of the banner, where it makes contact with the hanging system.

Heavy Duty Spur Grommets:

Placed through multiple layers of fabric, locking the hem and providing maximum security at banner stress points.

Double-Needle Lock Stitch:

All hems including pole pocket closure and banner sides are double-needle lock stitched for added durability in the outdoors.
