

## Create Unique, Eye-Catching Visuals with Faux Leather

Project Graphics has a long history of offering innovative solutions to client's for their point of purchase branding. Faux leather is used for hanging banners and table surfaces to add a natural, leather-like quality to any display environment. It is fabricated in a variety of colors and can be laminated to different backings that allow for a rigid versus drape like effect. Affordable and easily imaged with screen-print graphics or embossed, faux textiles help to synthesize brand and product in the marketplace.
